Subject: FW: CFAC Site Reassessment Report

Should we have Mike Cirian attend the meeting?

Subject: CFAC Site Reassessment Report

Hi,

Sorry this is getting to you so late in the day. I wanted to let you know that today I've finalized EPA's Site Reassessment Report of the Columbia Falls Aluminum Company Property. We've been able to start a web page that we're using to disseminate the report. Right now, only the report is on the page, but we'll get some more information on the web page early next week.

The website address is <http://www2.epa.gov/region8/columbia-falls-aluminum-reduction-plant> and the report can be found in the Site Documents section.

In the report narrative, Sections 1-3 present background information and information on our sampling event. Section 4 provides detailed investigation results. This section is designed to first look at the data from the potential source areas that EPA and its contractors thought had a high probability of contributing to environmental contamination (the Landfill area, the North Percolation Pond, and the South Percolation pond) and then look at the potential receptor areas to determine if the same constituents were present (residential wells, flathead river, cedar creek, and surface soils on the site). Section 5 provides a detailed migration pathway analysis that reviews the four different media EPA evaluates as part its Site Reassessment Process (Groundwater, Surface Water, Air and Soil Exposure). Finally, Section 6 is a summary of the report narrative.

EPA will be holding a public meeting on April 15th at 6:30pm at the Columbia Falls Fire Hall Meeting Room (624 1st Ave West, Columbia Falls). EPA will present the site reassessment sampling results. EPA and DEQ will discuss the various environmental programs that may be applicable at this site and answer questions regarding the programs. We're going to try to meet with other stakeholders before and after the meeting to get individual feedback and thoughts.

Please let me know if you have any questions about this work.

Thanks,
Rob
